RE: HP North Cafeteria Upgrade Phases 2 & 3 – Dynamic Closures Security Enclosure at Servery.

This letter is in response to your request for written confirmation regarding occupant load when security enclosures are in the closed position. The occupant load in the dishwashing area and servery will not exceed the total proposed 5 person limit when the enclosures are in the closed position. Also a version of the enclosure does come with the hardware as required by your letter dated September 16, 1999 to Clair Company, Inc. and will be purchased as part of the package.

If you have any further questions regarding the Café upgrade please call me at 715-3100.

Jim Hord
Project Manager
