DESIGN MEMORANDUM

TO: K3, Inc.
ATT: Steve King
FROM: Fred Wright, P.E.
DATE: September 10, 2007
PROJECT: Sparrow Hill Subdivision
SUBJECT: Earthwork Revisions, Lots 3-6

A Grading Plan for Lots 3-6 has been designed to comply with the requirements of Order No. 2007-060 for PLD07-00003. To meet the earthwork grades shown on the plans a portion of the existing fill material must be exported from the site. My estimate of the in-situ volume of this excess material is 305 cubic yards. It is my understanding that the material will be hauled and legally deposited on a private site outside the Corvallis City limits.

Respectfully submitted,

Fred Wright
